 Notice of Public Hearings Regarding  
 Petition of Elizabethtown Gas Company for Approval of New  
 Energy Efficiency Programs and Associated Cost Recovery Pursuant to the Clean  
 Energy Act and the Establishment of a Conservation Incentive Program BPU Docket No. GO20090619**

On September 25, 2020, Elizabethtown Gas Company (“Company” or “Elizabethtown”) filed a petition with the New Jersey Board of Public Utilities (“Board”) in Docket No. GO20090619 to establish new Energy Efficiency Programs (“EEPs”) for a three-year term from July 1, 2021 to June 30, 2024 and an associated cost recovery mechanism. The proposed EEPs and cost recovery mechanism are filed in accordance with the Clean Energy Act of 2018 (“CEA”) and the Board’s Order dated June 10, 2020 in Docket Nos. QO19010040, QO19060748, and QO17091004 (“June 2020 Order”). In general, the proposed EEPs provide monetary incentives and customer education to Elizabethtown’s residential and commercial customers to encourage energy efficiency.

The proposed program budget is \$99.9 million, which is comprised of \$90.6 million of program investment and \$9.3 million of operations and maintenance costs. Elizabethtown requests that the Board allow the Company to recover the costs of the EEP program, including a return on and return of the investments associated with the program. It is estimated that Elizabethtown would recover a total of approximately \$105.3 million from ratepayers and \$24.9 million from loan participants from 2021 through 2037.

The petition also includes a proposal to implement a Conservation Incentive Program (“CIP”) designed to recover lost revenues due to the EEPs and encourage Elizabethtown to invest in energy efficiency. The proposed CIP would quantify sales loss from energy efficiency by comparing actual usage per customer to baseline usage on a monthly basis, accounting for weather-related variation. The CIP would include certain customer protections, including a shareholder contribution to support conservation and education efforts.

The Company recovers the cost of its current EEPs through its EEP Rider rate. The Company’s current EEP Rider rate is \$0.0073 per therm. The proposed Year 1 EEP rate will be \$0.0155 per therm. This represents an increase of \$0.0082 per therm to the current EEP rate of \$0.0073 per therm for a total combined EEP rate of \$0.0155 per therm, to be effective upon issuance of a Board Order. The following chart reflects projections of the potential future rates and bill impacts through 2023:

	<u>Current Program</u>	<u>New Program</u>	<u>Increase</u>	<u>100 Therm Bill Change</u>
July 1, 2021	\$0.0073	\$0.0155	\$0.0082	\$0.82
July 1, 2022	\$0.0073	\$0.0237	\$0.0164	\$1.64
July 1, 2023	\$0.0073	\$0.0359	\$0.0286	\$2.86

If the new program is approved, the effect of the Year 1 rate change of \$0.0082 per therm on a typical residential customer using an average of 100 therms per month is illustrated below:

<u>Consumption in Therms</u>	<u>Present Bill</u>	<u>Proposed Bill</u>	<u>Change in Bill</u>	<u>Percent Change</u>
100	\$101.44	\$102.26	\$0.82	0.8%

The Board has the statutory and regulatory authority to approve and establish these tariff classifications and charges at levels it finds just and reasonable. Therefore, the Board may determine and establish these charges at levels other than those proposed by Elizabethtown.

Any assistance required by customers in ascertaining the impact of the proposed rate increase will be provided

by the Company upon request.
